"It is a great pleasure and honor for the Neurosurgery Clinic in Iasi, the board of the Romanian Society of Neurosurgery and myself to invite you to the 41st congress of the Romanian Society of Neurosurgery and to the 20th French Course in Neurosurgery.

Following an 82 year old tradition of continuous neurosurgical practice in Iasi that, from 1972, takes place in the first hospital in Romania dedicated exclusively to clinical neurosciences (Neurosurgery, Neurology, Neuro-Ophthalmology, Neuro Intensive Care) we are happy to invite you to the 4th Congress of the Romanian Society of Neurosurgery held in our city.

Recent significant developments in all neurosurgical centers in Romania including Iasi (advances in microneurosurgery, endoscopy, neuronavigation, endovascular neurosurgery, intraoperative monitoring, spinal instrumentation in particular and neuroimaging, neuroanesthesia, and neuro intensive care in general) represent a continuous challenge and provide a wide basis for discussion and professional exchange, reason for which the topics of this congress are focused on advances.

We hope to create, in the very pleasant venue of Palas Iasi, a perfect environment to present your achievements, to enrich your knowledge, to exchange ideas, and to meet the world experts invited to this edition of the congress."

Prof. I. Poata, MD, Ph.D

**President of the Romanian Society
of Neurosurgery**

**„Gr. T. Popa” University of
Medicine and Pharmacy, Iasi,
Romania**

**„Prof. Dr. N. Oblu” Clinical
Emergency Hospital Iasi**

**The 41st Congress of the
Romanian Society of
Neurosurgery**
